

COURSE SLIDES

AI for Career Coaching

Course Code: C431

Conducted by Tertiary Infotech Academy Pte Ltd · UEN 201200696W

Version v1.0 · 4 October 2026

© 2026 Tertiary Infotech Academy Pte Ltd. All rights reserved. · www.tertiarycourses.com.sg

COURSE ADMINISTRATION

Welcome & Housekeeping

Your Workshop

1

Provider

Tertiary Infotech Academy Pte Ltd

2

Trainer

Assigned by the provider; confirm your class invitation

3

Format

Concepts, demonstrations and eight connected labs

4

Duration

1 day · 7.5 instructional hours · schedule A07

Let's Know Each Other

1 Your name and organisation / role.

2 Your experience with this subject (if any).

3 What you want to be able to do after this course.

Ground Rules

1

Set your mobile phone to silent mode.

2

Participate actively — no question is too small.

3

Mutual respect: agree to disagree.

4

One conversation at a time.

5

Be punctual; return from breaks on time.

6

Learn by doing — try every hands-on lab.

SCHEDULE

Lesson Plan — One Day, 7.5 instructional hours

Morning

- Morning · 9:30am–1:15pm
 - Topic 1: Career Development Principles (Lab 1)
 - Topic 2: Assess Employee Competencies (Labs 2–3)

Afternoon

- Afternoon · 2:15pm–6:30pm
 - Topic 3: Career Management (Labs 4–6)
 - Topic 4: Support Career Plan Implementation (Labs 7–8)
- Daily timing
 - 9:30am–6:30pm · 1-hour lunch · two 15-minute breaks outside instruction

Learning Outcomes

1

Contract and coach

Conduct a consent-based career intake and use AI to draft neutral coaching questions.

2

Map skills and options

Map documented skills to role requirements and compare feasible career options.

3

Prepare and practise

Create truthful application materials and rehearse evidence-based interview responses.

4

Implement and review

Design a client-owned career action plan and review progress using appropriate indicators.

How You'll Learn

TOPIC 01

Career Development Principles

Human judgement · evidence · practical AI support

Career coaching contract

1

Purpose

Explore a decision the client owns

2

Scope

Agree goals, boundaries and success evidence

3

Review

Confirm what may be recorded or shared

Coach, client and AI

1

Client

Chooses priorities and final actions

2

Coach

Listens, challenges and checks context

3

AI

Drafts questions and organizes supplied evidence

GROW conversation

Goal versus solution

1

Premature

You should become a data analyst

2

Coaching

What would a satisfying working week look like?

3

Evidence

Test interest with a small project first

Career interests are hypotheses

1

Interests

Activities that energize the client

2

Values

Conditions the client will protect

3

Constraints

Time, location and available resources

Transferable career capital

1

Experience

Describe tasks and outcomes

2

Skills

Identify capabilities behind those outcomes

3

Transfer

Connect them to a different work context

A useful intake question

1

Open

What has changed in your work recently?

2

Specific

Which tasks do you enjoy and why?

3

Neutral

What options would you like to explore?

Consent before AI use

Minimum necessary context

1

Keep

Task evidence and stated preferences

2

Remove

Names, contact details and client IDs

3

Separate

Sensitive notes from the AI working brief

Prompt design framework

Evidence, inference and unknown

1

Evidence

Client reports coordinating 12 shifts

2

Inference

May have scheduling capability

3

UNKNOWN

No evidence yet of workforce analytics

When an AI answer feels certain

1

Claim

This is your ideal career

2

Challenge

Which supplied evidence supports it?

3

Repair

Present options and unresolved questions

Tool selection by task

1

General assistant

Draft and critique with provided context

2

Career product

Explore advertised coaching workflows

3

Human coach

Resolve nuance and own decisions

Worked intake: Mei

1

Situation

Retail supervisor exploring weekday work

2

Evidence

Shift planning and customer recovery

3

Question

What trade-offs are acceptable during a transition?

Topic 1 decision check

1

Purpose

Is the goal expressed in the client's words?

2

Consent

Can the client decline AI use?

3

Boundary

Can every output be reviewed by a coach?

Consent-Based Career Intake

LAB 1

At fictional Northstar Career Studio, you support Mei's career transition. Draft a coaching agreement and five neutral intake questions. You will connect the output to the next coaching task, inspect AI assumptions and keep the client in control. The completed artifact is intake-brief.md, ready for a human coaching review.

You'll build

Draft a coaching agreement and five neutral intake questions. Save intake-brief.md.

Tools: Approved conversational AI, document editor and supplied synthetic files

Consent-Based Career Intake

Test it

Intake brief contains a client-owned goal, AI consent choice, five neutral questions and three UNKNOWN items.

Recap — Career Development Principles

1

You can now: LO1: Conduct a consent-based career intake and use AI to draft neutral coaching questions.

TOPIC 02

Assess Employee Competencies

Human judgement · evidence · practical AI support

Competency is demonstrated

1

Claim

Good communication

2

Behavior

Explains shift changes to a team

3

Evidence

Meeting notes and a documented outcome

Evidence ladder

Skill inventory schema

1

Skill

Use a specific action verb

2

Evidence

Record the task and source ID

3

Confidence

Separate supported and unverified claims

Skills versus credentials

1

Skill

Can create a pivot table

2

Credential

Completed spreadsheet training

3

Gap

No work sample proving independent use

Worked skill extraction

1

S1

Planned rotas for 12 staff

2

Skill

Scheduling and resource coordination

3

Limit

Do not infer advanced workforce modeling

Role requirement decomposition

1

Must-have

Required work capability

2

Preference

Useful but negotiable experience

3

Context

Schedule, location and reporting duties

Evidence-to-requirement mapping

Gap priority matrix

1

Urgency

Does the role require it now?

2

Impact

Would it unlock an important task?

3

Feasibility

Can the client practise it soon?

A gap is a learning question

1

Vague

Improve analytics

2

Specific

Build a weekly sales pivot table

3

Proof

Explain the trend and check the totals

Compare three paths

1

Adjacent

Operations coordinator

2

Bridge

Customer success associate

3

Stretch

Junior business analyst

Weighted option comparison

1

Criteria

Interest, evidence, access and constraints

2

Weights

Client chooses importance before scoring

3

Review

Vary one weight and discuss changed rankings

Scores are discussion aids

1

Useful

Expose trade-offs consistently

2

Risk

Numbers imply certainty without evidence

3

Repair

Keep assumptions beside every score

Market research provenance

Internal mobility

1

Employee

Expresses interests and preferences

2

HR

Confirms eligibility and opportunities

3

Manager

Discusses release time and stretch work

Topic 2 decision check

1

Evidence

Every claimed skill has an ID

2

Unknowns

Missing requirements remain visible

3

Choice

Client can explain the preferred experiment

Build a Skills Evidence Ledger

LAB 2

At fictional Northstar Career Studio, you support Mei's career transition. Translate work examples into an auditable skills inventory. You will connect the output to the next coaching task, inspect AI assumptions and keep the client in control. The completed artifact is skills-ledger.csv, ready for a human coaching review.

You'll build

Translate work examples into an auditable skills inventory. Save skills-ledger.csv.

Tools: Approved conversational AI, document editor and supplied synthetic files

Build a Skills Evidence Ledger

Test it

Every skill has an S1–S4 ID; advanced analytics and CRM remain UNKNOWN.

Compare Career Options

LAB 3

At fictional Northstar Career Studio, you support Mei's career transition. Compare three plausible pathways against Mei's preferences and evidence. You will connect the output to the next coaching task, inspect AI assumptions and keep the client in control. The completed artifact is options-matrix.csv, ready for a human coaching review.

You'll build

Compare three plausible pathways against Mei's preferences and evidence. Save options-matrix.csv.

Tools: Approved conversational AI, document editor and supplied synthetic files

Compare Career Options

Test it

Three options are compared; weights total 100; no fictional role is presented as an active vacancy.

Recap — Assess Employee Competencies

1

You can now: LO2: Map documented skills to role requirements and compare feasible career options.

TOPIC 03

Career Management

Human judgement · evidence · practical AI support

Job search as a learning loop

Resume claim integrity

1

Source

Original work evidence

2

Draft

Action plus task plus verified result

3

Review

Remove any invented metric or responsibility

Worked resume transformation

1

Before

Responsible for rotas

2

After

Coordinated weekly rotas for 12 staff

3

Boundary

No claim of reducing overtime without evidence

Keywords with context

1

Useful

Use the role's language where accurate

2

Weak

Copy all keywords without proof

3

Better

Attach each important phrase to a real example

ATS is not a hiring guarantee

1

Structure

Use clear section headings

2

Content

State relevant, truthful capability

3

Reality

A matching score does not predict an offer

Cover letter argument

1

Role

Why this work interests the client

2

Evidence

Two relevant examples

3

Bridge

Acknowledge a gap and a practical learning plan

A professional profile

1

Headline

Describe target work and current strengths

2

Summary

Connect past evidence to future contribution

3

Proof

Use work samples the client may share

Networking with permission

1

Purpose

Ask for insight into a role

2

Message

Be concise and specific

3

Boundary

The learner reviews and sends any message

Interview question design

1

Behavioral

Tell me about a service recovery

2

Situational

How would you prioritize urgent requests?

3

Role-specific

How do you check a weekly report?

STAR evidence structure

Feedback that improves answers

1

Observe

Quote the answer's actual evidence

2

Explain

Identify an unclear or missing element

3

Practise

Ask one follow-up and retry the answer

A rehearsal conversation

1

Question

Describe a difficult staffing decision

2

Answer

I reorganized coverage after two absences

3

Follow-up

What was your role and what evidence confirms the result?

Ethical interview rehearsal

1

Before

Practise with AI and human feedback

2

During

Follow the interview rules and answer personally

3

After

Reflect without uploading private interview material

Coaching record quality

1

Record

Goal, agreed actions and client corrections

2

Omit

Unneeded identifiers and speculative labels

3

Share

Only the agreed summary with authorized people

Topic 3 decision check

1

Truth

No application statement exceeds evidence

2

Practice

Feedback points to a concrete revision

3

Control

Client approves the final text

Create Truthful Application Materials

LAB 4

At fictional Northstar Career Studio, you support Mei's career transition. Create a targeted resume summary and cover letter grounded in evidence. You will connect the output to the next coaching task, inspect AI assumptions and keep the client in control. The completed artifact is application-pack.md, ready for a human coaching review.

You'll build

Create a targeted resume summary and cover letter grounded in evidence. Save application-pack.md.

Tools: Approved conversational AI, document editor and supplied synthetic files

Create Truthful Application Materials

Test it

All factual claims trace to evidence; no savings or hiring guarantee appears; the client voice is retained.

Practise a Coaching Interview

LAB 5

At fictional Northstar Career Studio, you support Mei's career transition. Rehearse two answers and improve them with specific feedback. You will connect the output to the next coaching task, inspect AI assumptions and keep the client in control. The completed artifact is interview-log.md, ready for a human coaching review.

You'll build

Rehearse two answers and improve them with specific feedback. Save interview-log.md.

Tools: Approved conversational AI, document editor and supplied synthetic files

Practise a Coaching Interview

Test it

Two answers and revisions are logged; feedback references the actual answer and unsupported results are removed.

Review Coaching Records and Bias

LAB 6

At fictional Northstar Career Studio, you support Mei's career transition. Produce a minimal coaching summary and check recommendation consistency. You will connect the output to the next coaching task, inspect AI assumptions and keep the client in control. The completed artifact is record-review.md, ready for a human coaching review.

You'll build

Produce a minimal coaching summary and check recommendation consistency. Save record-review.md.

Tools: Approved conversational AI, document editor and supplied synthetic files

Review Coaching Records and Bias

Test it

Summary has no contact data; changes in advice are inspected; one repair and a sharing boundary are documented.

Recap — Career Management

1

You can now: LO3: Create truthful application materials and rehearse evidence-based interview responses.

TOPIC 04

Support Career Plan Implementation

Human judgement · evidence · practical AI support

From aspiration to experiment

1

Aspiration

Explore an operations role

2

Experiment

Create a sample scheduling dashboard

3

Learning

Discuss it with a consenting mentor

SMART action design

1

Specific

Name the work product

2

Measurable

Define observable completion

3

Feasible

Fit the client's time and resources

4

Dated

Choose a review date

30–60–90 day plan

1

Days 1–30

Test role interest and build evidence

2

Days 31–60

Seek feedback and refine materials

3

Days 61–90

Review progress and decide next steps

Action register

1

Action

Create one sample weekly report

2

Owner

Client owns the work; coach supports review

3

Evidence

Report file and reflection

4

Review

Date and next decision recorded

HR frameworks in context

1

Eligibility

Confirm internal mobility rules

2

Learning

Agree access to projects and mentors

3

Progression

Ask for written role expectations

Stakeholder map

1

Client

Owns the goal and shares preferences

2

Coach

Supports reflection and evidence review

3

HR and manager

Confirm policy and available opportunities

Permission before automation

1

Draft

AI proposes a message or appointment

2

Review

Client checks recipients and content

3

Approve

Client decides whether to send

4

Record

Keep only necessary confirmation

Barriers and contingency plans

1

Barrier

Only two study hours each week

2

Adaptation

Split the work sample into small tasks

3

Trigger

If two milestones slip, renegotiate scope

Leading and lagging indicators

1

Leading

Practice sessions and work samples completed

2

Lagging

Interviews and role changes

3

Interpretation

Progress depends on opportunity and context

Worked programme metrics

1

Invited

20 fictional participants

2

Engaged

15 completed an agreed action

3

Rate

$15 / 20 = 75\%$ engagement

4

Limit

This does not establish programme causality

Quality over activity count

1

Volume

Ten applications sent

2

Quality

Three relevant applications with verified evidence

3

Learning

Record feedback that changes the strategy

Fairness review

1

Test

Vary irrelevant personal labels in a synthetic brief

2

Compare

Check whether recommendations change

3

Repair

Use job-related evidence and human review

Review cadence

1

Weekly

Check action completion and blockers

2

Monthly

Review evidence and preferences

3

Decision point

Continue, revise or stop the experiment

Vendor claims and boundaries

1

Capability

Verify current public feature descriptions

2

Outcome

Treat vendor metrics as contextual claims

3

Practice

Use the course's synthetic data in any tool

Topic 4 decision check

1

Action

Every milestone has an owner and date

2

Review

Evidence informs the next conversation

3

Agency

The client can revise the plan

Build a 30–60–90 Day Plan

LAB 7

At fictional Northstar Career Studio, you support Mei's career transition. Turn the preferred career experiment into dated milestones. You will connect the output to the next coaching task, inspect AI assumptions and keep the client in control. The completed artifact is action-plan.csv, ready for a human coaching review.

You'll build

Turn the preferred career experiment into dated milestones. Save action-plan.csv.

Tools: Approved conversational AI, document editor and supplied synthetic files

Build a 30–60–90 Day Plan

Test it

Milestones cover all three periods, fit time constraints and have owners, dates, evidence and a contingency.

Review a Coaching Pilot

LAB 8

At fictional Northstar Career Studio, you support Mei's career transition. Interpret a fictional coaching programme and propose a next improvement. You will connect the output to the next coaching task, inspect AI assumptions and keep the client in control. The completed artifact is pilot-review.md, ready for a human coaching review.

You'll build

Interpret a fictional coaching programme and propose a next improvement. Save pilot-review.md.

Tools: Approved conversational AI, document editor and supplied synthetic files

Review a Coaching Pilot

Test it

Rates use explicit denominators; 15/20 is 75%; 8/20 is 40%; causality is not claimed.

Recap — Support Career Plan Implementation

1

You can now: LO4: Design a client-owned career action plan and review progress using appropriate indicators.

WRAP-UP

Course Summary & Next Steps

What You Achieved

1

Contract and coach

Conduct a consent-based career intake and use AI to draft neutral coaching questions.

2

Map skills and options

Map documented skills to role requirements and compare feasible career options.

3

Prepare and practise

Create truthful application materials and rehearse evidence-based interview responses.

4

Implement and review

Design a client-owned career action plan and review progress using appropriate indicators.

NEXT STEPS

Continue your coaching practice

- 1 Run one small, consent-based coaching pilot.
- 2 Keep an evidence ledger with every AI draft.
- 3 Review action progress with the client after 30 days.

Keep Practising After the Course

1

Re-run the labs on your own machine — repetition is what makes the skills stick.

2

Apply the techniques to a real process or project in your own organisation.

3

Open the current material links on the course registration page.

4

Explore the follow-on courses at www.tertiarycourses.com.sg.

THANK YOU FOR ATTENDING

Thank You!

You now have the practical skills from every lab in this course — keep applying them to your own work.
